Rabbit Management Sheet

Description

Overview

Managing a rabbitry requires precision and organization to ensure optimal breeding and health outcomes. The first step involves tattooing each rabbit with a unique Rabbit ID using a recommended animal tattooing machine. For marking your rabbits with a permanent ID, we recommend using an animal tattooing machine such as the one pictured below. Complete set includes one tattoo plier only and 0-9 digits sold separately. They have a four-digit capacity for efficient identification. They are designed for use with tattoo ink for permanent markings.

This ID is crucial for tracking purposes throughout the rabbit’s life. Additionally, all cages should be serially numbered and categorized into breeding or general cages. Breeding cages are designated for bucks and does intended for reproduction, as well as their kits until they are weaned.

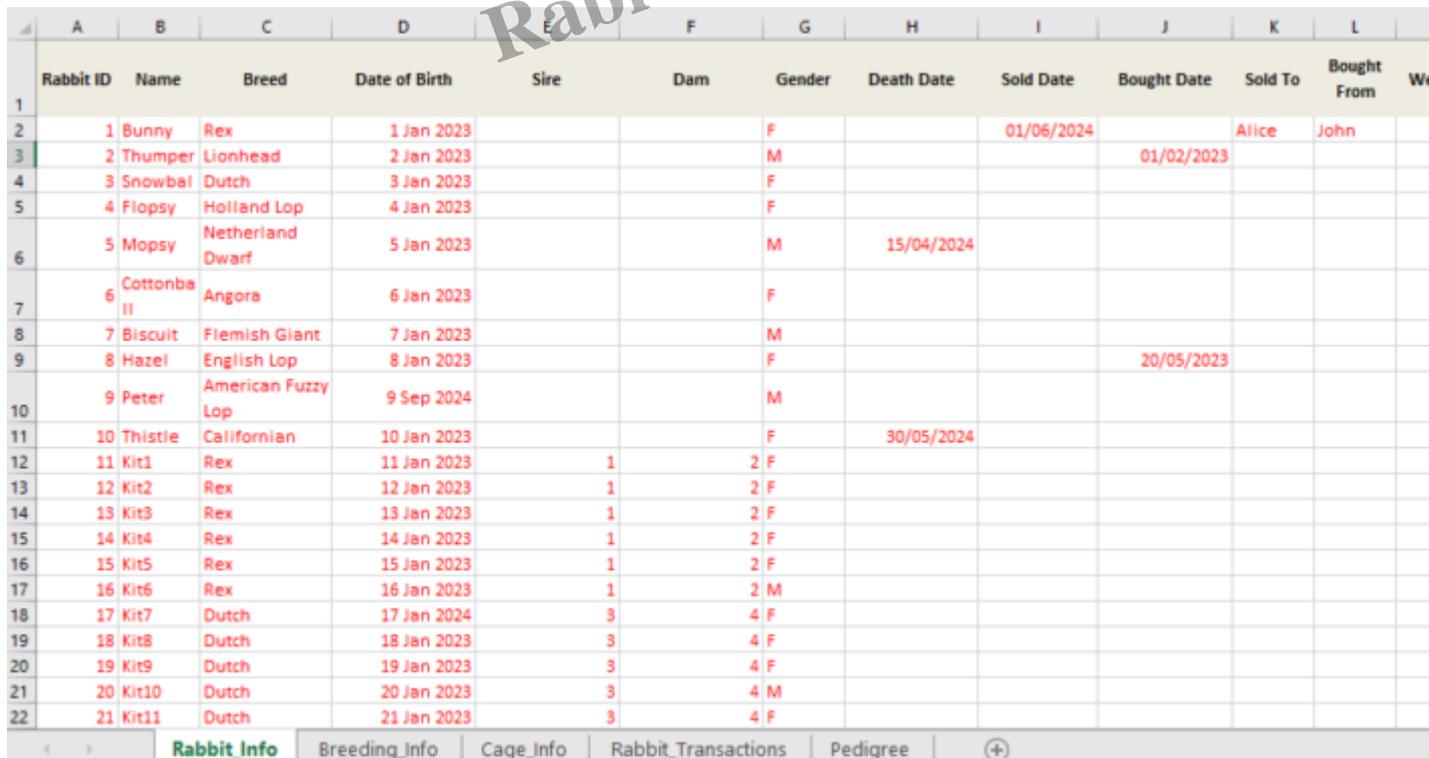

Our rabbit management sheet is currently in its formative stage, meaning it is undergoing continuous improvement to reach a professional standard. Future versions will include enhanced visual presentations and integrated financial records to provide comprehensive management capabilities.

The rabbit management sheet comprises several interconnected sheets, each serving a specific purpose:

- **Rabbit Info Sheet:** Records detailed information about each rabbit.
- **Breeding Info Sheet:** Tracks breeding events and schedules.
- **Cage Info Sheet:** Monitors the occupancy and allocation of rabbits in cages.
- **Rabbit Transactions Sheet:** Logs all transactions, including sales, purchases, and mortalities.
- **Pedigree Sheet:** Automatically generates lineage information to prevent inbreeding.

- **Instructions**
 - Replace the template records with your farm’s data.
 - Avoid editing columns highlighted in black as they are auto-populated.
- **Importance**

- This sheet is critical for tracking the gender of rabbits, their cage allocation, and all transaction records.
- Information from this sheet is referenced by other sheets, making it the backbone of the management system.
